

SOUTHWEST GREENS®  
GOLF & GRASS

— CAPTURING —  
**THE ESSENCE**  
OF PERFECT GRASS

**Bolt**, a patented fiber technology offered exclusively through Shaw Industries, brings together the best attributes of grass—esthetic and durability. Its lightning bolt-shaped angles reflect light for a lower luster and more natural looking lawn—while maintaining a long-lasting solution with far less maintenance. In fact, Bolt's performance grade fibers are so durable it exceeds the most stringent industry requirement for simulated wear by two times.

**Southwest Greens is resetting the standard** for high performance landscape turf and leads the industry by supplying commercial grade product for residential applications. While other companies sacrifice quality to retain bottom lines Southwest Greens has embraced the opposite approach through an extensive R & D process. When combined with the patented HydroChill™ evaporative cooling technology you can be assured that landscape projects have the optimum in aesthetics, durability and comfort.

Designed to meet the needs of high traffic in the commercial marketplace Bolt™ is perfect for applications such as event spaces or lawns that require reliability. A full compliment of face weights and colorways allow aesthetics to meet the utmost in performance specifications.

**BOLT ATTRIBUTES**

<p><b>SUPERIOR SPRING BACK</b></p>  <p>Best resistance to matting and is perfect for high traffic</p>	<p><b>LISPORT TESTING</b></p>  <p>Twice the wear resistance as the industry standard</p>	<p><b>RESINS</b></p>  <p>Highest performance resins provide superior market place quality</p>	<p><b>REFLECTIVITY</b></p>  <p>Unique turf fiber shape refracts light creating a low luster appearance</p>
